### **Questions:**

- Why do you want to become a donor?

**As an embryologist, I've witnessed firsthand the emotional and physical challenges many individuals and couples face when struggling with infertility. I understand the vital role that egg donation can play in helping others achieve their dream of becoming parents. This insight has given me a deep sense of empathy and a strong motivation to contribute personally. Beyond the science, I see the human impact of what we do every day, and becoming a donor is a way for me to use my own biology to make a real difference in someone's life. With my medical knowledge and awareness of the process, I feel confident, informed, and committed to donating responsibly and compassionately.**
